

SK Discovery Summer Internship Program

The Company (<https://www.skdiscovery.com/en/main.do>)

SK Discovery is a holding company under the SK Group, which is the 3rd largest conglomerate in South Korea. SK Discovery holds highly competitive business companies in various business fields: environment-friendly materials, vaccines/pharmaceuticals, energy/chemicals, and real estate development.

We help each business entity establish new growth strategies that are tailored to the characteristics of its business, proactively implement them, and ultimately create customer value in line with the company's vision and mission.

In terms of corporate culture, SK Discovery aims to change the way of working and build high-growth organizations. As the digital transformation trends newly shape the business landscape, it is very challenging to lead the market with new products and services that address the needs of the customers.

Concerning Digital Transformation, SK Discovery launched a business incubation division called Discovery Lab. Through Discovery Lab, we plan to incubate new businesses and provide shared infrastructures related to Digital Transformation.
